

Kafka Broker

Understanding Kafka Architecture

What is Apache Kafka?

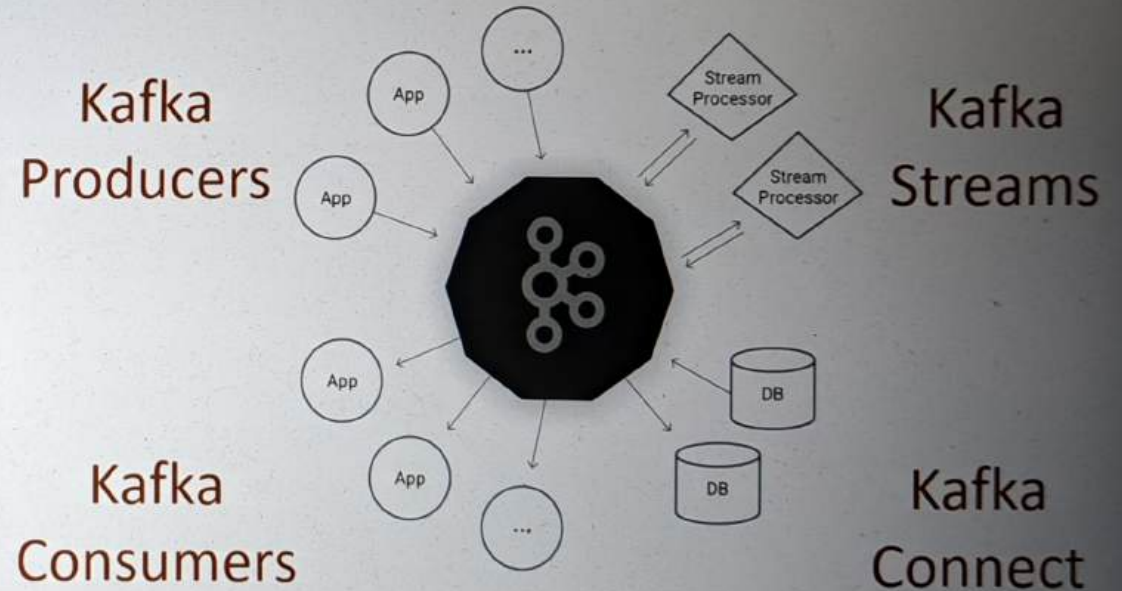

What is Kafka?

What is Kafka?

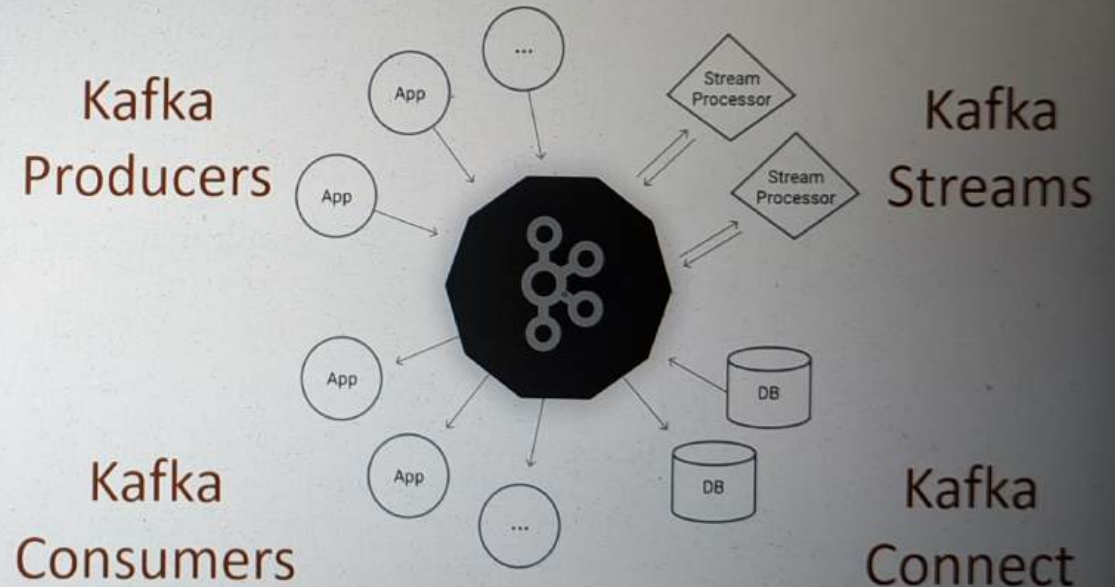

Broker Responsibilities

- ➔ 1. Receive messages from the producers and acknowledge the successful receipt.
- 2. Store the messages in a log file to safeguard it from potential loss.
- 3. Deliver the messages to the consumers when they request it

What is Kafka?

1. Kafka Storage Architecture
2. Kafka Cluster Architecture
3. Work Distribution Architecture

Apache Kafka is a horizontally scalable, fault-tolerant, distributed streaming platform.
